Acceptance of National Scientific Students' Associations Conference (OTDK/TDK)
work as thesis in

MSc in Computer Science
MSc in Autonomous Systems
MSc in Data Science programmes

- General informations
- Documents to be uploaded
- If the TDK work has been accepted as a thesis already before the semester of the Final Examination exam
- If the presentation of the TDK work (thesis) and the semester of the Final Examination are the same

Acceptance of National Scientific Students' Associations Conference (OTDK/TDK) work as thesis

In the MSc in Computer Science, Autonomous Systems and Data Science programmes

- As a result of the faculty TDK conference, those TDK works recommended to OTDK - based on the jury's decision - a decision is issued of those works accepted as theses. This decree includes the work being accepted as a thesis and its evaluation being excellent (5). (Name TDK dolgozat határozat.docx)
- In the Final Examination, the student must present his/her work and defend the TDK work (this ensures that the Committee can ask questions). The Committee (from 2024) will ask questions related to the topic of the thesis specified in the electronic request for registration for the Final Examination. This is assessed with a grade.
- In the case of a TDK/OTDK work that has several authors, the defence takes place in the same Committee, but separately for each student. In the defence, the student must primarily present the result of his/her own work and cover the results of other authors to the extent that the solved task can be understood.

Acceptance of National Scientific Students' Associations Conference (OTDK/TDK) work as thesis

In the MSc in Computer Science, Autonomous Systems and Data Science programmes

Documents to be uploaded in Neptun:

- the thesis (in this case the OTDK/TDK work)
- **Statement of Originality:**
Computer Science MSc / Computer Science for Autonomous Systems MSc
- Thesis Topic Registration Form
- If the thesis includes a program, then it has to be uploaded as well
- In the case of a multi-author thesis, the description of the division of work.
- The student has to send the decision on the acceptance of the TDK work as a thesis and its excellent (5) mark (Name TDK dolgozat határozat.docx) to the head of the Education Office via [email](#), who will ensure that it is uploaded to Neptun.

There are two different ways for the TDK work to be accepted as thesis:

- If the TDK work has been accepted as a thesis already before the semester of the Final Examination exam
- If the presentation of the TDK work (thesis) and the semester of the Final Examination are the same

Acceptance of National Scientific Students' Associations Conference (OTDK/TDK) work as thesis

In the MSc in Computer Science, Autonomous Systems and Data Science programmes

If the TDK work has been accepted as a thesis already **BEFORE THE SEMESTER OF THE FINAL EXAMINATION EXAM**

- In the semester in which you apply for the Final Examination, you have to register for the Thesis Consultation subject linked to your supervisor with the subject code in accordance with the curriculum during the subject registration period.
- You have to upload the previously submitted TDK work to Neptun in accordance with the deadline set for the given semester (by December 1 or May 1) as detailed above.
- You have to request a decision to be issued and sent at least two weeks before the upload by **Péter Kovács**, secretary of the TDK.
- The decision is sent via **email** to the head of the Education Office, who uploads it to Neptun.
- The evaluation of the TDK work has to be uploaded by the supervisor to Neptun, making it available to the Final Examination Committee.

INFORMATICS

In the case of the acceptance of the OTDK/TDK application as a thesis, the deadlines for obtaining the absolatory (pre-degree certificate) may alter (due to the issuing of the decision). Please inquire at your **student coordinator!**

Acceptance of National Scientific Students' Associations Conference (OTDK/TDK) work as thesis

In the MSc in Computer Science, Autonomous Systems and Data Science programmes

If the semester of presentation of the TDK work (thesis) and the semester of the Final Examination are the same

- In the semester in which you apply for the Final Examination, you have to register for the Thesis Consultation subject linked to your supervisor with the subject code in accordance with the curriculum during the subject registration period.
- You have to upload the previously submitted TDK work to Neptun in accordance with the deadline set for the given semester (by December 1 or May 1).
- The student uploads the same thesis to tda.inf.elte.hu by the current semester deadline (December 1 and May 1).
- If the jury accepts the work as a thesis, the student has to request a decision to be issued and sent at least two weeks before the upload from [Péter Kovács](#), secretary of the TDK.
- The decision is sent via [email](#) to the head of the Education Office, who uploads it to Neptun.
- If the jury accepts the work as a thesis the evaluation of the TDK work has to be uploaded by the supervisor to Neptun, making it available to the Final Examination Committee.
- If the TDK jury does not accept the TDK work as a thesis, the supervisor writes an evaluation of the thesis and uploads it to Neptun by the specified deadline. In this case, the grade of the thesis will be given by the decision of the Final Examination Committee.
